

MACARTHUR STATION CONSTRUCTION PROJECT

Dear Customer:

As part of our system-wide Earthquake Safety Program, we will begin strengthening structures at the MacArthur Station to withstand future earthquakes. During the project, you can expect construction-related noise and some dust. We will post signs with safety information and to alert you of work in progress.

Construction Work Details

- **Description: Installing flexible floor joints to protect utilities and equipment**
- **Location: Inside utility rooms (non-public areas), at the north and south ends of the station building- equipment will require partial closure of plaza area and sidewalk north of station on 40th Street.**
- **Start Date: Approximately April 2009**
- **Duration: Approximately four months**
- **Hours: Most work between 7:00 A.M. and 3:30 P.M. on weekdays, with some night work.**
- **Emergency work as necessary**

A separate project to strengthen columns over 40th street will occur in mid-2009. Earthquake Safety Program construction will be underway at various locations throughout the BART system over the next five years, and is expected to be complete by the end of 2014. You can view a BARTtv news story about our Earthquake Safety Program construction projects at www.bart.gov/news/barttv.

As always, safety is BART's top priority. Our aim is to strengthen BART as quickly as possible, while maintaining BART service.

To contact the Earthquake Safety Program or obtain additional information, please visit our website at www.bart.gov/earthquakesafety or call our Program Information Line at **510.874.7425**. We thank you for your patience and cooperation.
