

Earthquake Safety Program Construction Begins near Coliseum Station

January 19, 2018

Dear Community,

As part of BART's systemwide Earthquake Safety Program, retrofit construction will be performed inside and around the Coliseum Station, including adjacent areas. The first activity will begin outside the station, off San Leandro Street in the stairwell and below the eastern part of the Coliseum Pedestrian Bridge. This work activity is estimated to begin the week of January 22, 2018.

The Station will remain open for BART riders during construction. Please see the diagram on the next page for the general location of construction activity. Work areas will be fenced in, and you will see large equipment accessing the site such as lifts, dump trucks, and drill rigs. **During this construction activity, pedestrian access via the San Leandro Street stairwell will be temporarily closed. However, the Pedestrian Bridge (Walkway) will remain open to the public. Please follow directional signs for detour access to Pedestrian Bridge.**

Please watch for additional notices regarding upcoming construction. During construction, your cooperation in proceeding around work areas with caution and watching for signs with directional and safety information is appreciated. Noise and dust will be monitored, and local regulations will be enforced to minimize any inconveniences. A related project to retrofit the Fruitvale Station is also projected to begin the week of January 22, 2018. We apologize for the inconvenience. Our aim is to retrofit BART as quickly as possible, while maintaining BART service.

If you need language assistance services, please call BART's Transit Information Center at (510) 465-2278.

如需語言援助服務，請致電 BART 公共交通資訊中心，電話號碼為 (510) 465-2278。

Si necesita servicios de asistencia de idioma, llame al centro de información de tránsito del BART al (510) 465-2278.
