

# Concord Station Modernization, Plaza Redesign, and Bike Station Design

BART is planning for some short-term improvements and is developing a long-term vision for the Concord Station. Please join us at a City of Concord Community Workshop to share your thoughts on what improvements you would like to see at the station. Your input will help us to prioritize potential improvements.

## Online Survey

*If you cannot attend the event please go to the survey located at [www.bart.gov/Concord](http://www.bart.gov/Concord) and tell us your opinion*

## Contact

For additional information, or if you require special assistance or translation services please contact Sadie Graham.

**5:30 - 7:30 pm**

**Willow Pass Center**

**2748 East Olivera Road, Concord**

A light dinner, childcare and Spanish Translation services will be provided

## Station Modernization

BART is embarking on a Station Modernization Program that will invest resources and efforts into the existing core stations and surrounding areas to advance transit ridership and enhance the quality of life around the stations. As part of our Station Modernization effort, BART is currently developing a conceptual redesign of the Concord Station. The goal of the project is to develop potential station improvements to upgrade and modernize the station function, safety, capacity, sustainability, appearance, and improve the customer experience. Your input will help to prioritize the improvements based upon future funding opportunities.
