Construction Notification #006

Guideway Foundation Construction

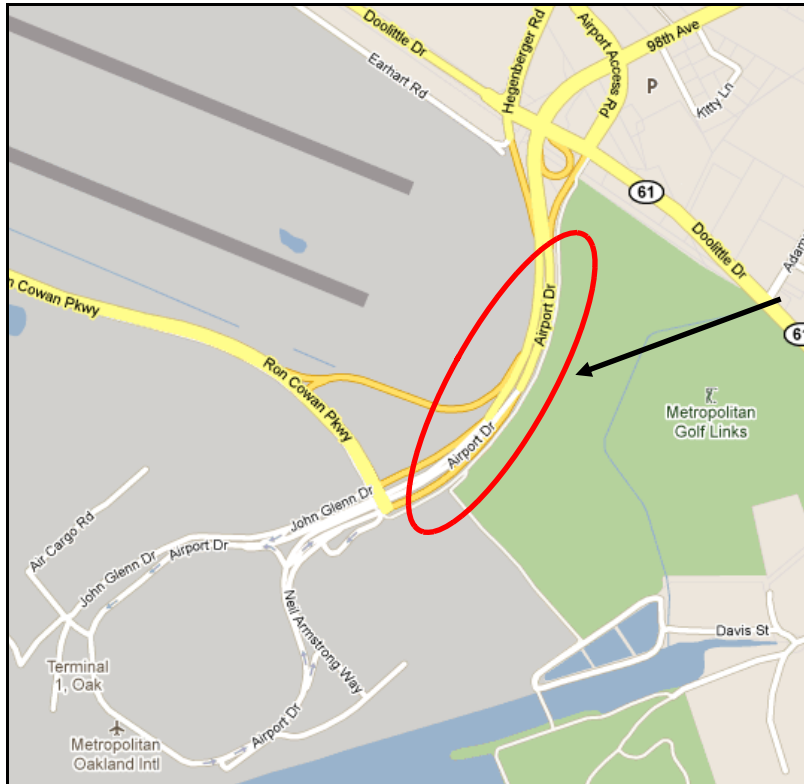

July 2011

Beginning July 5, crews will begin construction of the Oakland Airport Connector (OAC) guideway foundation on Port of Oakland property along Airport Drive, between The Oakland International Airport (OAK) and Doolittle Drive.

For the past few weeks, large equipment needed to construct the superstructure has been onsite. As part of the continued work, customers should be aware of the following conditions due to work activities:

- K-rail (concrete barrier) installation
- Clearing the work area, including cutting of concrete, jackhammering, and tree removal
- Pile driving, to provide foundation support for the substructure
- Delivery of construction materials
- Increased dust, as part of the excavating process
- Monitoring noise and vibration levels

Pile driving work will produce noise and vibrations in the immediate area. All efforts will be taken to minimize noise, vibration, and other disruptions to the community. Please watch for notices regarding future construction activities and signs with safety information. We appreciate your patience and cooperation during this work.

**Foundation Construction Work
Impact Zone**

Work Area: Airport Drive,
between OAK and Doolittle Drive

Lane Closures: No anticipated
lane closures
