Construction Notification #25

Guideway Foundation and Column Construction – Interstate 880 North of Hegenberger Road and Hegenberger Road On- and Off- Ramps

June 2012

The Oakland Airport Connector (OAC) project will soon begin to construct the system's guideway foundation and column structures along the Interstate 880 median, shoulders, and Hegenberger Road on- and off- ramps, north of the Hegenberger Road exit and between South Coliseum Way/Edes Avenue and Edgewater Drive/Hegenberger Loop. After the foundation and column structures are constructed, the system's steel truss guideway will be installed, which will allow OAC vehicles to cross over Interstate 880 on a dedicated aerial structure.

The public should be aware of the following construction impacts:

- Lane reconfigurations and shifting of traffic on Interstate 880, the Hegenberger Road exit on- and off- ramps, and Hegenberger Road
- Large equipment and materials in view in the Interstate 880 median, shoulders, and Hegenberger Road on- and off-ramps
- Noise, vibration and dust from excavating, pile driving, deep drilling, jackhammering and off-hauling materials

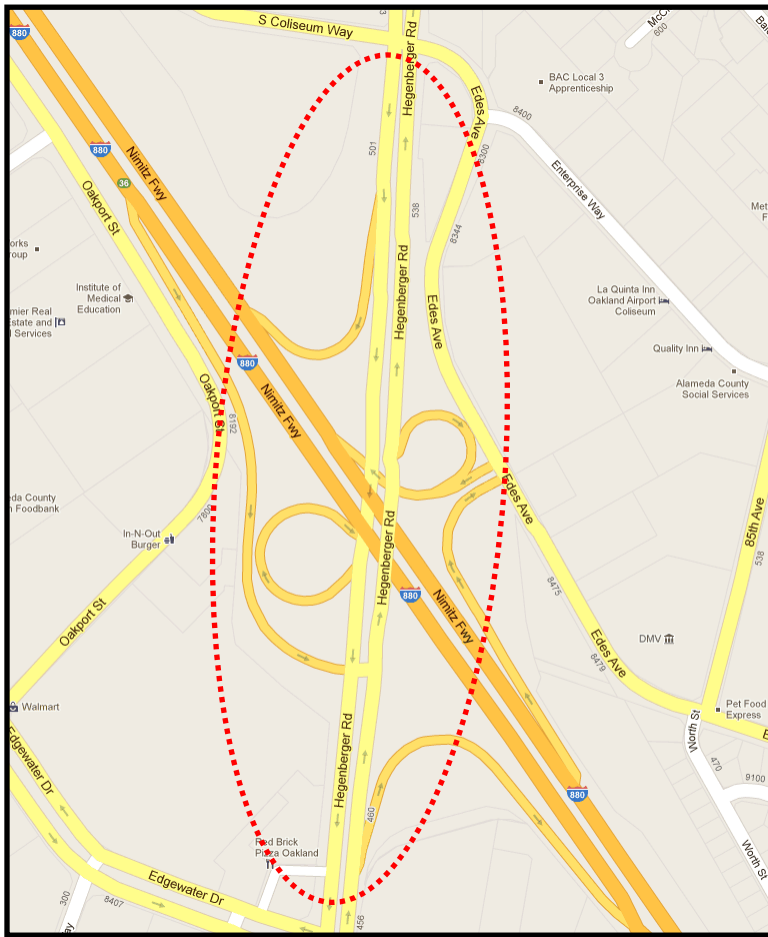

General work hours are 7 am to 7 pm Monday through Saturday. However, some work will be performed at night between 9 pm and 5 am Monday through Sunday.

Noise, dust and vibration levels will be monitored and all efforts will be taken to minimize these and other disruptions to the community. Stormwater pollution prevention plans are also in place to mitigate the project's environmental impacts. Please watch for notices regarding future construction activities and signs with safety information.

We appreciate your patience and cooperation during this work.
