

# BART

## Oakland Airport Connector (OAC)

### Construction Details

#### Summary of Activities

Traffic will shift from the northbound to southbound side of Doolittle Drive, and the left turn from southbound Doolittle Drive onto Airport Access Road will be closed.

#### Start Date

August 2012

#### Estimated Duration

- Traffic modifications and left turn closure through September 2012
- Subway construction through March 2013
- General construction of OAC through 2013

#### Impacts

- Lane reconfigurations, closures and shifting of traffic
- Large equipment and materials being transported and installed adjacent to vehicular traffic
- Construction-related noise, vibration and dust from the excavation process

### General Work Hours

#### Subway Construction

6 am to Midnight  
Monday through Saturday

# Construction Notification #30

## Traffic Switch and No Left Turn

### Doolittle Drive at Airport Access Road

### August 2012

The Oakland Airport Connector (OAC) project will be switching traffic to construct a subway structure that will allow OAC trains to travel underneath the intersection of Airport Access Road and Doolittle Drive, to and from Oakland International Airport.

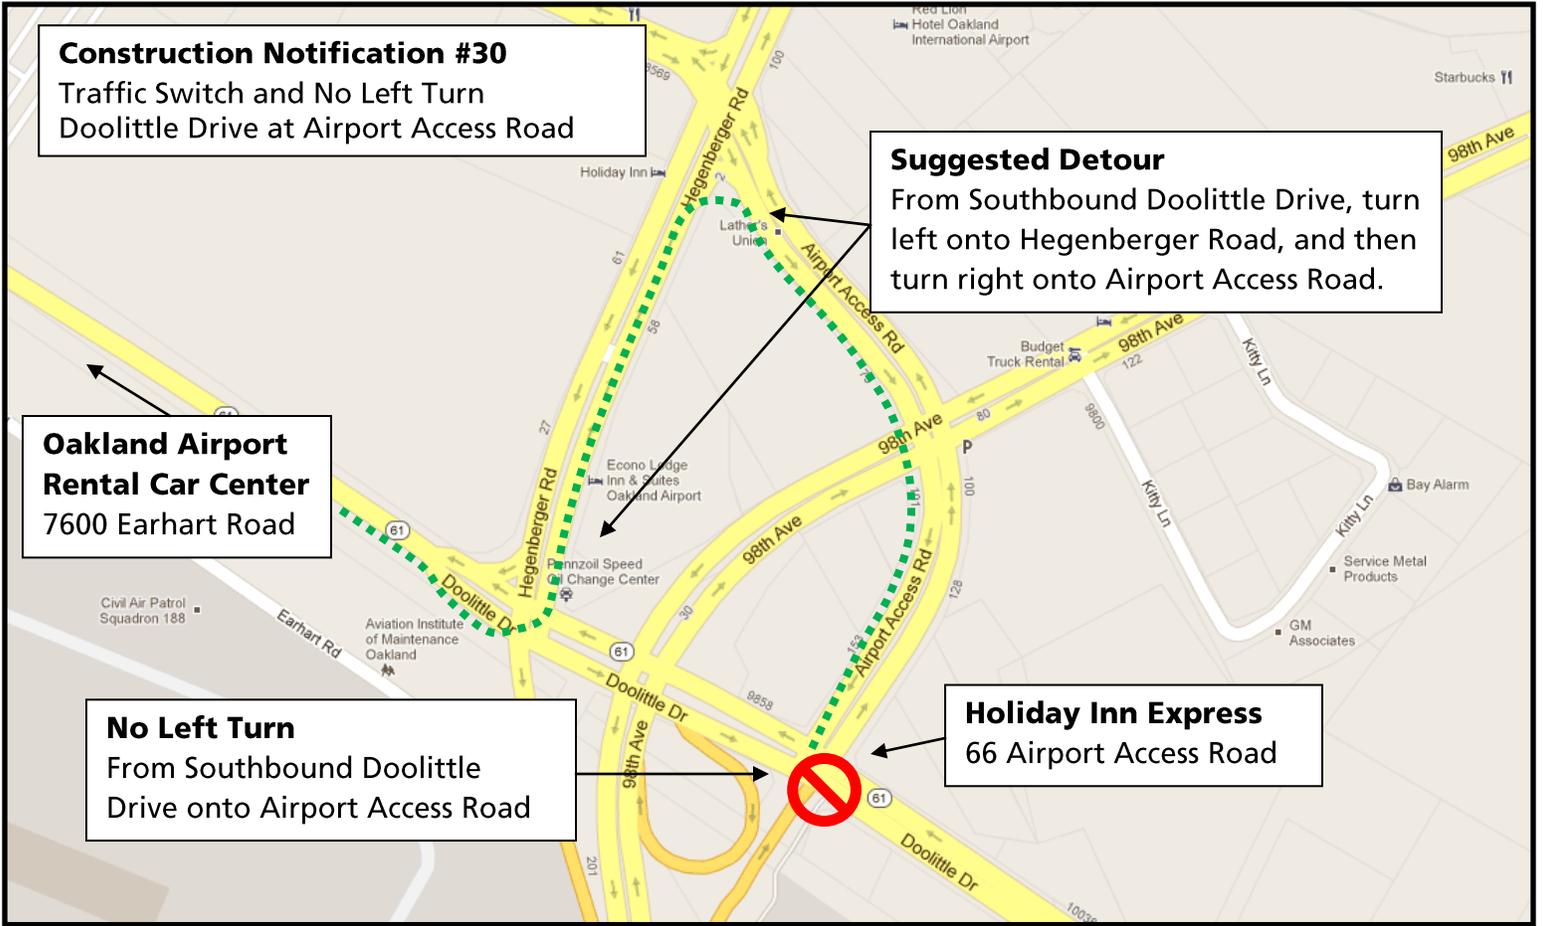

The public should be aware of the following construction impacts, beginning August 2012:

- **Traffic on Doolittle Drive is currently shifted to the northbound side of the road, but will shift to the southbound side of the road.**
- **The left turn from southbound Doolittle Drive onto Airport Access Road will be closed for approximately one month. To access Airport Access Road from southbound Doolittle Drive, turn left at Hegenberger Road, then turn right on Airport Access Road (see exhibit on the back of this page).**
- **The right turn from northbound Doolittle Drive onto Airport Access Road will not be affected.**

Subway construction work hours are from 6 am to midnight Monday through Saturday. General work hours are from 7 am to 7 pm Monday through Saturday and periodically at night from 9 pm to 5 am Monday through Saturday.

Noise, dust and vibration levels will be monitored and all efforts will be taken to minimize these and other disruptions to the community. Stormwater pollution prevention plans are also in place to mitigate the project's environmental impacts. Please watch for notices regarding future construction activities and signs with safety information.

We appreciate your patience and cooperation during this work.
