Construction Notification #41

Nighttime Closures of 98th Avenue for Guideway Truss Installation

September 2013

The Oakland Airport Connector (OAC) project is currently installing the system's elevated steel truss guideway between Hegenberger Road and the Oakland International Airport. This segment will begin the final extension of the elevated guideway connecting the intermediate Maintenance and Storage Facility to the Oakland International Airport.

The public should be aware of the following construction impacts:

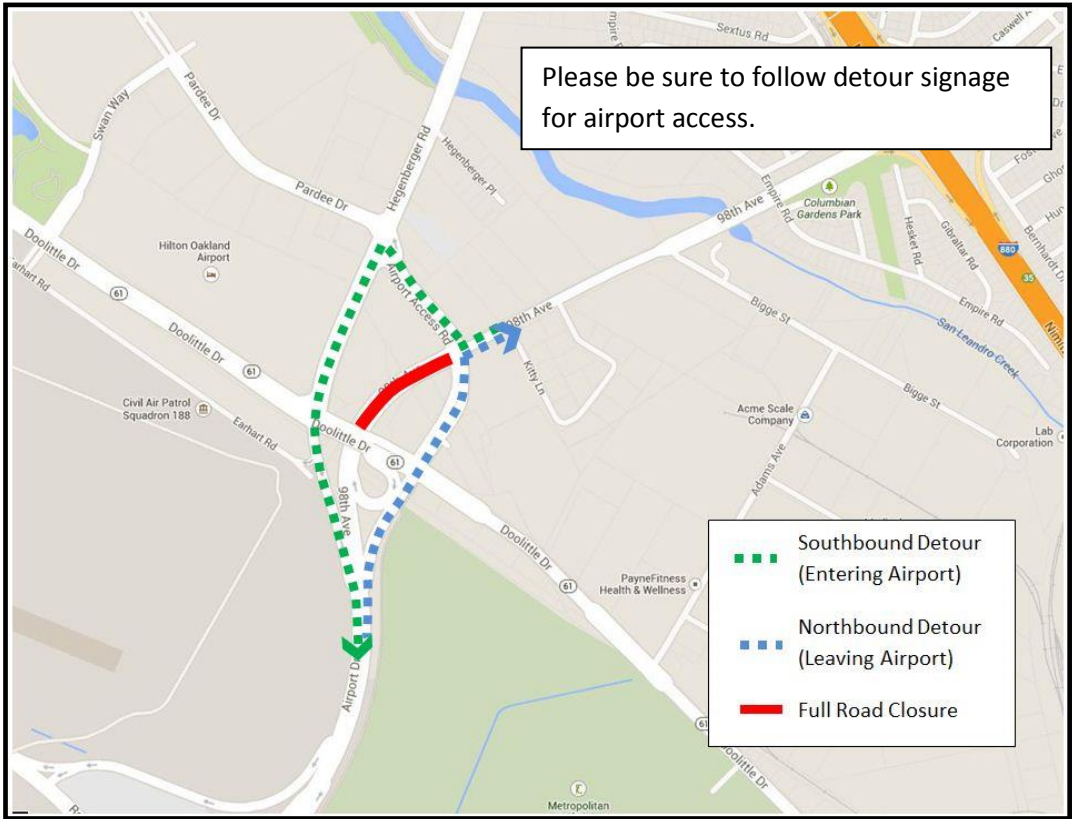

- **Northbound and Southbound road closures on 98th Avenue impacting incoming and outgoing airport access.**
- Lane reconfigurations, lane closures and shifting of traffic on Hegenberger Road between San Leandro Street and Doolittle Drive
- Large equipment and materials being transported and installed overhead
- Construction-related noise and light from the truss installation process during evening hours

Truss installation will be performed at night between 9 pm and 5 am Monday through Sunday. However, other construction activities may be performed from 7 am to 7 pm Monday through Saturday.

Noise, dust and vibration levels will be monitored and all efforts will be taken to minimize these and other disruptions to the community. Stormwater pollution prevention plans are also in place to mitigate the project's environmental impacts. Please watch for notices regarding future construction activities and signs with safety information.

We appreciate your patience and cooperation during this work.
