

BART MARKET STREET STATIONS ENTRANCE PROJECTS

Neighborhood Notice and News

March 2022

Dear BART Neighbors:

BART crews continue to make progress on escalator and canopy projects along Market Street at the four downtown BART stations. Both contracts are well underway as the BART District constructs a total of 19 canopies and 41 new street and platform escalators. We thank you for your patience as we complete these important contracts at our four downtown stations.

Escalator Project Update

Embarcadero Station:

On Monday, March 14, BART's Escalator contractor will begin work on barricade installation around the easternmost platform escalator inside the Embarcadero Station. The public will see construction of a plywood barricade surrounding the escalator unit. The barricade will create a safe workspace for the contractor and protect BART patrons from construction activity. This work is expected to be completed by Fall 2022.

Montgomery Station:

BART is in the homestretch to open a newly rebuilt escalator located in the sunken plaza (One Post Plaza) at Montgomery Station in late March 2022.

A platform escalator inside Montgomery Station and near the westerly exits is also scheduled to reopen in the weeks ahead.

Powell Station:

A platform escalator inside Powell Station at the midpoint of the station is also scheduled to reopen in the weeks ahead.

Canopy Project Update:

The Canopy contractor is progressing with work at two Market Street locations – New Montgomery & Market and 5th & Market. The work at these two locations started in January 2022 and is anticipated to be complete by Summer 2022. The contractor is committed to keeping the street-level, fence-enclosed work area tidy during construction. A clear pedestrian pathway is being maintained at all times allowing access to Market Street business entrances during construction. Work is presently taking place during daytime hours on weekdays.
