

BART Safety Tips

To help keep you safe, BART has more than 4,000 working cameras throughout our system and we are increasing police presence.

Please follow these important safety tips while traveling on BART:

- Download the free BART Watch App: it lets you send a private text to BART police dispatch.
- Know your train car number: it's located above the doors on each end.
- Secure or hold your phone, laptop, or purse tightly when waiting on a platform or near train car doors while on trains, especially as doors open.
- Be aware of surroundings and avoid looking distracted, especially while standing near stairs, escalators, and train doors and anywhere suspects can make a quick exit.
- Don't sleep on board train cars.
- The Train Operator is in the first train car; it's a great place to sit if you are traveling alone.
- If something makes you feel uncomfortable, move to another train car.
