

STATION PROFILES – HOME ORIGINS

This section contains a summary sheet for each BART station, based on data from customers who travel to the station from home. Maps for each station are contained in separate PDF files at www.bart.gov/stationprofile. Note that the San Francisco International Airport (SFO) and Oakland International Airport stations are not included, as they are not home origin stations.

The maps in the separate PDF files depict home origin points of customers who use each station, and the points are color coded by mode of access. The points are weighted to reflect average ridership (Tuesday – Thursday) at the station. For example, an origin point with a weight of seven will appear on the map as seven points, scattered around the actual point of origin. Note that the number of trips may appear underrepresented in cases where multiple trips originate at the same location.

The following summary sheets contain basic information about each station’s weekday home origin trips, such as:

- absolute number of entries and estimated home-origin entries
- access mode share
- trip destination types
- customer demographics*

Percentage statistics are reported in whole numbers. Percentages of 0.5% and above were rounded up. Columns may not add exactly to 100% due to rounding.

Percentages can be converted to absolute numbers of passenger trips (on an average Tuesday – Thursday) using the number of home-based trips listed at the top of each summary page.

All data in this section, except the Trip Destination chart, are weighted using origin weights. Data in the Trip Destination chart use origin-destination weights.

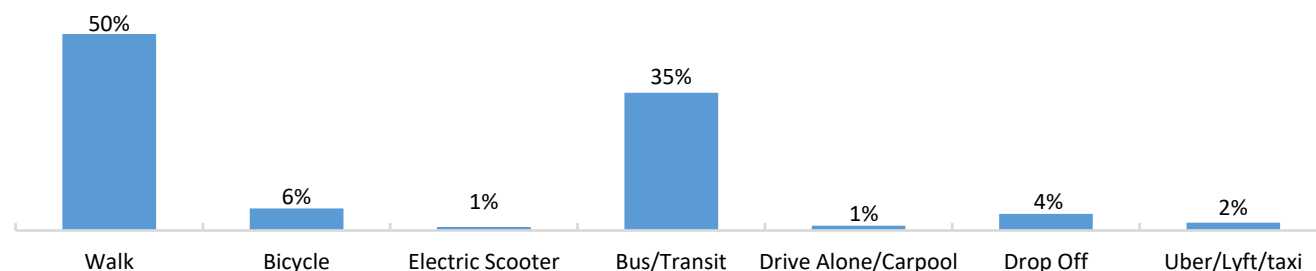

**Note that 13 – 17 year olds are likely under-represented due to the sampling methodology, which focused on age 13+ for the self-administered version of the questionnaire and age 16+ for the interviewer-administered version of the questionnaire.*

12TH ST. / OAKLAND CITY CENTER STATION – HOME ORIGINS

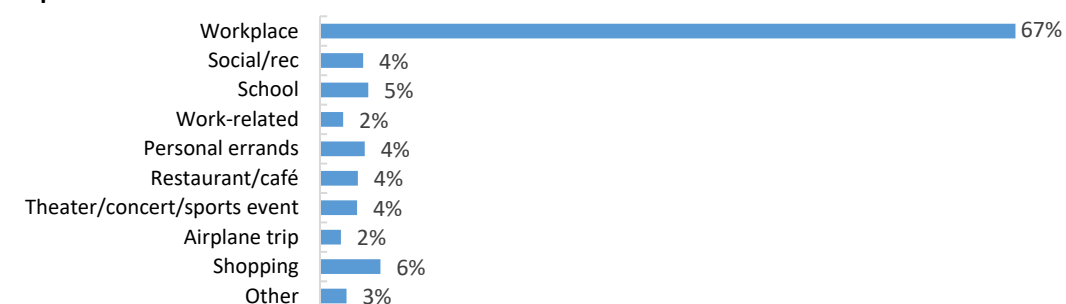

Ridership

On an average Tuesday – Thursday, 5,831 riders enter 12th St. / Oakland City Center Station. Of these riders, **2,288 riders are coming from home**. The percentages on this page apply to these home origin riders.
