

**BART Agreement Number: 6M8142**

**Approval Date: 04/14/2026**

## **Work Plan B.11-05 Engineering Support During Construction**

### **Scope:**

The project will be split into two contracts: 15TC-025, which includes 4 critical slopes with high severity damage along L&M lines, and contract 15TC-013 that includes 21 sites with medium to severe damage to the slopes along A&C lines and is partially funded through a CalOES/FEMA Grant. The construction for both projects is performed by in-house maintenance forces.

The Consultant shall provide the following scope of services which will be provided for both the contracts (15TC-025 and 15TC-013):

1. Provide design support services during construction (DSDC) including attendance at weekly progress meetings, review and responding to RFIs, including the provision of engineering support and supplemental specifications required during construction, supporting encroachment permitting process, traffic control support, coordination with local agencies, and conducting one engineer's surveillance inspection per site at completion of construction to determine that final site conditions have been prepared in accordance with Contract Documents.
2. Produce record drawings at construction completion.

**Prime: AECOM**

**Subconsultants: None**

**Total Work Plan Value: \$ 511,905**
