October 18, 2018

Dear Fruitvale Station/Village Community,

As part of BART’s systemwide Earthquake Safety Program, seismic retrofit work at the Fruitvale Station continues in multiple locations in and around the station, including new work starting near Avenida de la Fuente (Work Area 1). Construction work will be performed on each column that holds up the BART trackway under the alignment in the pedestrian sidewalk. There are four general work areas currently underway. Please see the diagram on the back of this bulletin for construction locations.

Work areas will be fenced in, and you will see construction equipment accessing the site such as scissor lifts, dump trucks, drill rigs and scaffolding. During this construction, pedestrian access will be slightly detoured with directional signage. Please proceed around construction areas with caution and watch for signs with safety information and other notices. Additionally, expect some traffic and parking impacts from time to time. Construction at south of 35th Avenue (Work Area 4) is near completion. Temporary closure of approximately six (6) parking spots in the BART Fee lot will remain until this work is completed. Please note that vehicles not moved from areas that have been posted with “No Parking” signs will be subject to ticketing and/or towing. Noise and dust will be monitored, and local regulations will be enforced to minimize any inconveniences.

We appreciate your patience and cooperation during this work. As always, safety is BART’s top priority. Our aim is to complete seismic retrofit work as quickly as possible, while maintaining BART service. Fruitvale Station will REMAIN OPEN for BART riders during construction.
