

EARTHQUAKE SAFETY PROGRAM

ALLOW ADDITIONAL TIME TRAVELING ON SAN LEANDRO STREET, NEAR COLISEUM STATION MAIN ENTRANCE

Dear Customer:

PLEASE ALLOW MORE TIME to travel on San Leandro Street and to access the Coliseum BART Station main entrance on weekdays due to earthquake safety construction activity and delivery occurring. All lanes are open, with soft delineators bordering San Leandro Street along with Flaggers supporting this work. **PLEASE USE CAUTION and WATCH FOR DETOURS AND SIGNAGE.** You will see heavy equipment, such as trucks and scissor lifts with temporary, soft enclosures and working near the main entrance of the Coliseum Station. Flaggers will be on site to assist patrons. Earthquake Safety construction consists of seismic retrofit work performed on each footing and pier cap (a beam connecting two columns) that serves to support the BART trackway under the alignment. Construction at this location is expected to continue for approximately 6-8 weeks and will include heavy drilling activities that will make noise. Noise, dust and odors will be monitored, and local regulations will be enforced. Allow additional time for travel and watch for detours, directional/informational signs.

Construction Activity at Coliseum Station

We recognize the inconvenience and appreciate your patience and cooperation during this work. As always, safety is BART's top priority. Please proceed around construction areas with caution and watch for signs with safety information and other notices. Please be advised that changes/modifications may be required at any time; the construction team will make every effort to minimize inconveniences. Our aim is to complete seismic retrofit work as quickly as possible, while maintaining BART service.
