

# EARTHQUAKE SAFETY PROGRAM

## ALLOW ADDITIONAL TIME TRAVELING ON SAN LEANDRO STREET, NEAR COLISEUM STATION MAIN ENTRANCE

Dear Community:

**PLEASE ALLOW MORE TIME** to travel on San Leandro Street and to access the Coliseum BART Station main entrance on weekdays due to earthquake safety construction activity and delivery occurring. **Starting as early as Monday, April 22, expect work activity off San Leandro Street (near the Coliseum Station main entrance) to cause temporary delays for a concrete pour.** You will see heavy equipment such as trucks, concrete pump/hose, and scissor lifts, along with Flaggers on-site to assist with traffic control and pedestrian navigation. All lanes are expected to remain open, with lane narrowing and soft delineators bordering San Leandro Street. **PLEASE USE CAUTION. ALLOW ADDITIONAL TIME FOR YOUR TRAVEL, and WATCH FOR DETOURS AND SIGNAGE.** Earthquake Safety construction consists of seismic retrofit work performed on each footing and pier cap (a beam connecting two columns) that serves to support the BART trackway under the alignment. Construction at this location is expected to continue for a couple weeks and includes heavy drilling activities that will make noise. Noise, dust and odors will be monitored, and local regulations will be enforced.

### Construction Activity at Coliseum Station off San Leandro Street

**We recognize the inconvenience and appreciate your patience and cooperation during this work.** As always, safety is BART's top priority. Please proceed around construction areas with caution and watch for signs with safety information and other notices. Please be advised that changes/modifications may be required at any time; the construction team will make every effort to minimize inconveniences. Our aim is to complete seismic retrofit work as quickly as possible, while maintaining BART service.
