

**Scope:**

The scope of services includes the following:

- Consultant shall assess the condition of abutments.
- Consultant to assess the existing condition of wayside and track drainage, contributing to the water intrusion to the slopes. Examine record drawings, verify in the field the as-built condition, and propose a new and improved drainage schemes to divert the water away from the abutments and slopes
- Consultant to support BART Project Manager in meeting with adjoining jurisdiction representatives where the slopes are located (City, County, State).
- Attend bi-weekly design meetings and comment-resolution meetings (use appropriate form).
- Bid process support and DSDC services.
- Provide future maintenance procedure for the designed improvements.
- All other task, not listed here, but is necessary to prepare and submit the complete deliverables
