[www.bart.gov/jobs](http://www.bart.gov/jobs)

Ride BART to a satisfying career that lets you make a difference in the San Francisco Bay Area. BART is the fifth busiest passenger rail system in the nation. BART provides quality service running on an asset base that combines 43 year old infrastructure with trend-setting technology.

BART is looking for Engineering professionals who love to solve complex engineering problems, work in a fast paced environment and have a passion for connecting more than 430,000 daily riders to work, school, and other places they need to go. Join the Engineering Revolution to Build a Better BART!

The Engineering organization plays an essential role in the improvement of BART's infrastructure by driving capital projects and ensuring assets maintain high operational reliability. BART engineers are maintenance and construction friendly team players whether working in design, analysis or process improvement areas.

About 30% of BART's engineering workforce is projected to retire over the next 4 years. Meanwhile, our system is growing, so we plan to continue hiring throughout the year.

BART offers one of the most comprehensive compensation and benefits programs you will find anywhere. Benefits include the renowned CalPERS pension, excellent medical, vision, and dental coverage, supplemental insurances, excellent paid holidays and vacation, as well as two investment programs, one of which is entirely funded by BART on your behalf. BART also saves you money in your paycheck, because no deductions are made for Social Security.

If you are a creative problem solver with a passion for channeling your considerable technical skills to advancing BART's infrastructure performance, then apply to join the team today. Take advantage of the job alert feature on BART's website to be notified as postings open up.
