EARTHQUAKE SAFETY PROGRAM NIGHTTIME CONSTRUCTION AND DETOURS INSIDE COLISEUM STATION FOR STAGE 3 SEISMIC RETROFIT CONSTRUCTION

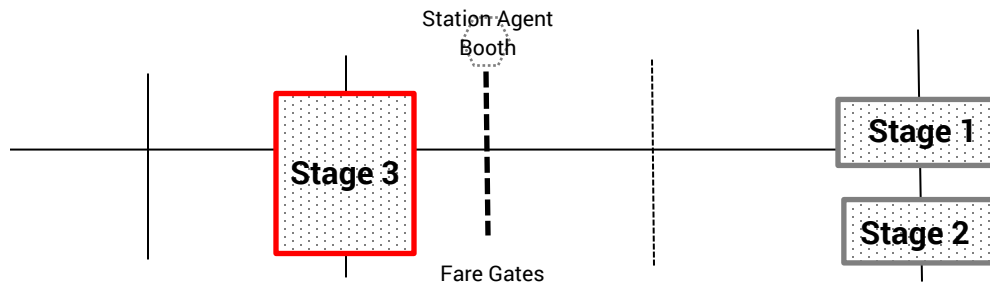

Dear Customer:

As part of the BART systemwide Earthquake Safety Program, BART crews will be working inside the COLISEUM Station for seismic retrofit construction. This work will require construction activity at various locations and stages inside and outside the patron area. **Nighttime work activity is scheduled for the next two weeks starting Thursday, April 4 from approximately 9:00 pm. This work will occur nightly, except on Sunday, continuing through the Saturday morning blanket (non-revenue hours), April 12.** Stages 1, 2, and 3 construction continue during the daytime and are enclosed with temporary fenced-in plywood barriers/temporary soft delineators. You will see construction equipment accessing the site such as scissor lifts, drill rigs, concrete pump/hose and trucks, and temporary scaffolding/structures. Earthquake Safety construction consists of seismic retrofit work performed on each footing and pier cap (a beam connecting two columns) that serves to support the BART trackway under the alignment.

Stage 1 Closure: Construction continues behind the escalator located on the south-end of the Concourse, allowing for patron use to and from the Platform for approximately 2 more months.

Stage 2 Closure: Construction requires temporary closure of the southwest stairwell for approximately 3-4 months.

Stage 3 Closure: Construction in the area located north of the fare gates and west of the pedestrian tunnel has begun in a temporary enclosure overhead. This work activity includes heavy drilling that will make noise. Sound barrier blankets will be in place to minimize noise levels. Noise, dust and odors will be monitored, and local regulations will be enforced. **All dates are approximate and subject to change*

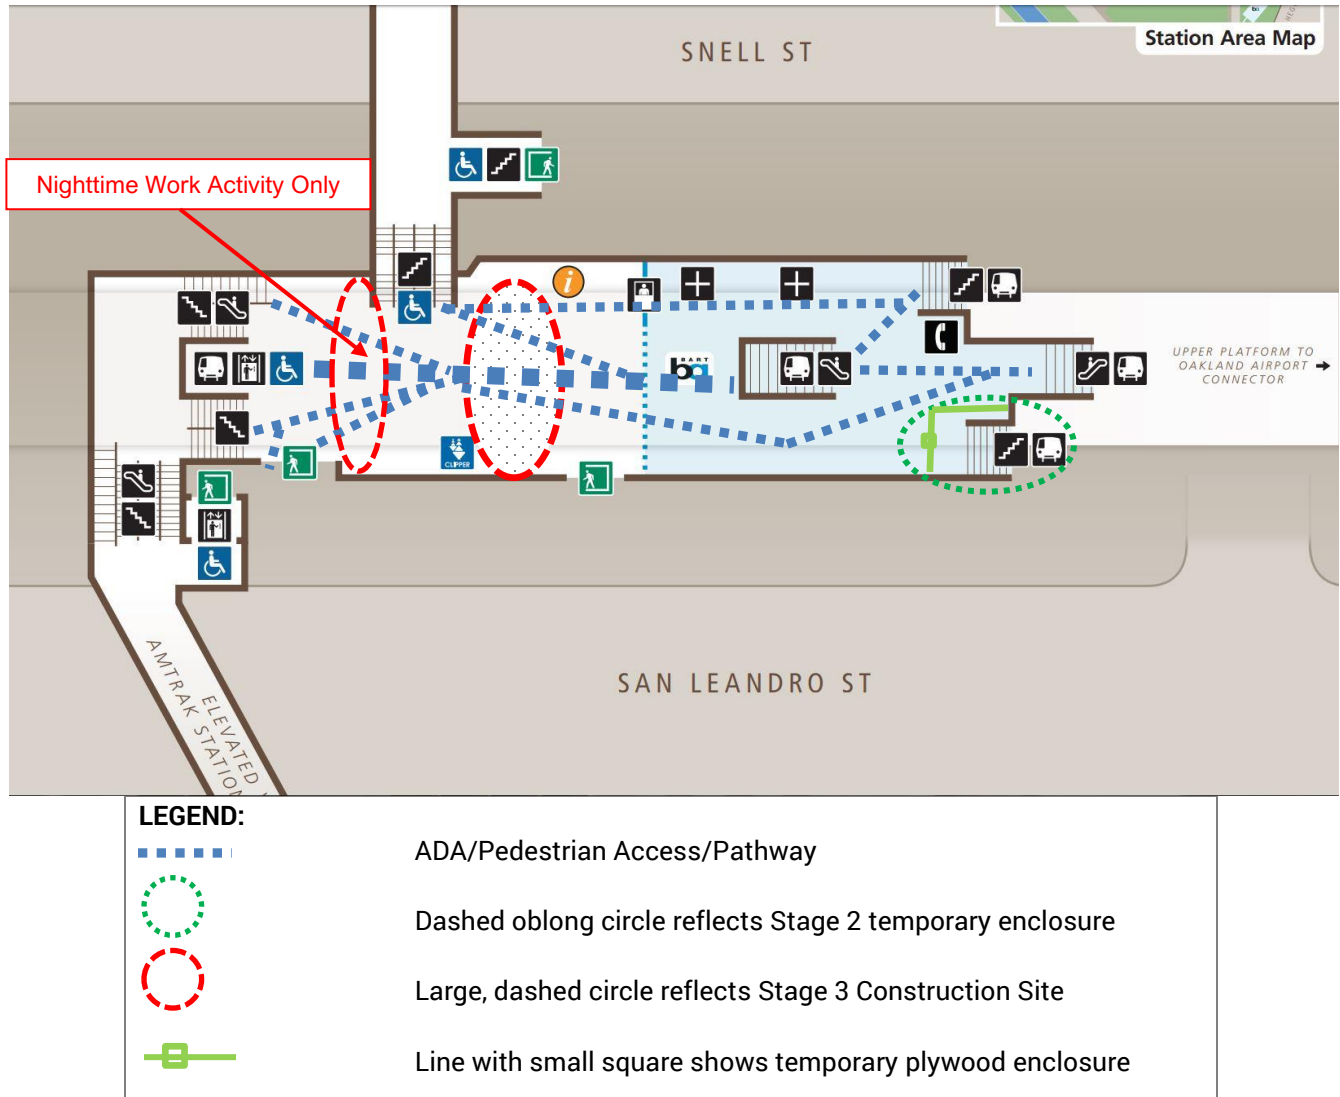

Add fare and parking machines, restrooms, elevators, escalators, and stairs – except the southwest stairwell, will remain accessible (open) during Stage 2 and 3 construction. **Please watch for directional signs and allow for additional travel time, through the Concourse and between the Concourse and Platform.** Similar earthquake safety retrofit construction is underway at Fruitvale Station.

Seismic retrofit construction continues outside Coliseum Station on both the north and south-end of the Station, mainly off San Leandro Street. Temporary relocation of ADA and BART parking located on the westside (San Leandro Street side) of the station continues. Construction outside the station on the south-end is nearing completion. EARTHQUAKE SAFETY PROGRAM

Construction Activity inside Coliseum Station

We recognize the inconvenience and appreciate your patience and cooperation during this work. As always, safety is BART's top priority. Please proceed around construction areas with caution and watch for signs with safety information and other notices. Please be advised that changes/modifications may be required at any time; the construction team will make every effort to minimize inconveniences. Our aim is to complete seismic retrofit work as quickly as possible, while maintaining BART service.
