Construction Notification #39 Coliseum Station Transition Building Ongoing Construction

July 2013

The Oakland Airport Connector (OAC) project is under construction in various locations throughout the Hegenberger Road business corridor and will continue to construct the Coliseum Station Transition Building, a structure at the south end of the existing Coliseum/Oakland Airport BART Station that will allow passengers to transfer from existing BART to the new service. The Transition Building includes a stairway, escalators and elevators, and will support an elevated pedestrian walkway over San Leandro Street from the BART station to the new Coliseum Station structure, where construction is also underway.

The public should be aware of the following construction impacts:

- Lane reconfigurations, lane closures and shifting of traffic on San Leandro Street, adjacent to the BART station
- Large equipment and materials being transported and installed overhead at the south end of the BART station's platform
- Construction-related noise, dust and vibration

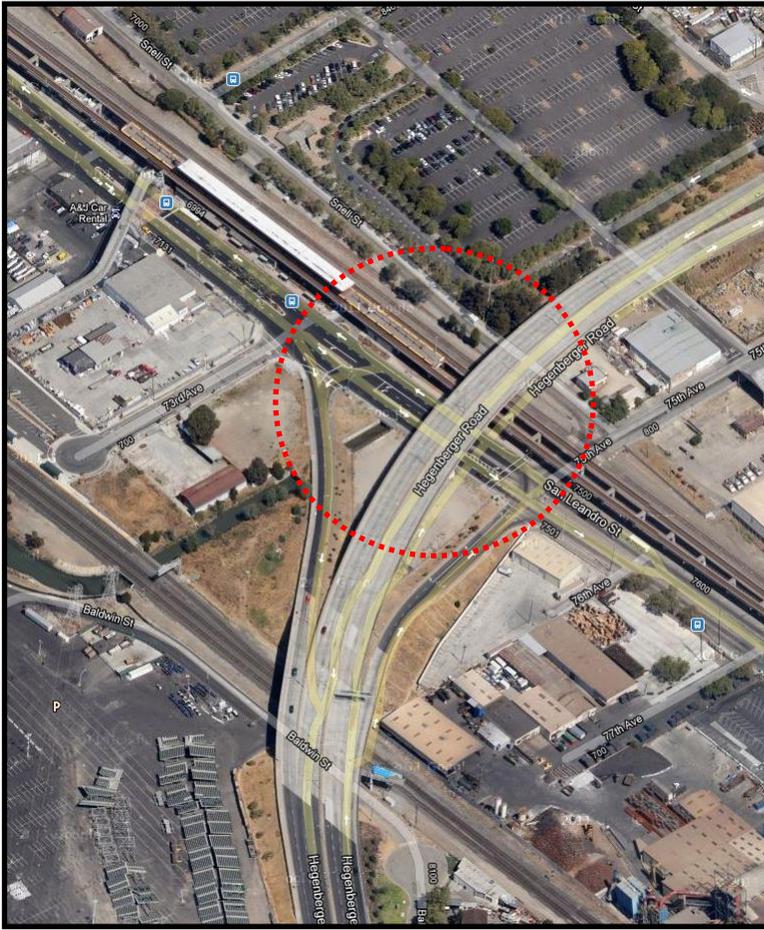

Construction of the Transition Building will be performed from 7 am to 7 pm, Monday through Saturday, and at night from 9 pm to 5 am, Monday through Sunday.

Noise, dust and vibration levels will be monitored and all efforts will be taken to minimize these and other disruptions to the community. Stormwater pollution prevention plans are also in place to mitigate the project's environmental impacts. Please watch for notices regarding future construction activities and signs with safety information. Also note that there is a separate construction project underway at the overpass adjacent to this site, which may necessitate separate closures. For questions related to road closures, feel free to call Mr. Phillip Fung of the City of Oakland Public Works Agency/Project Delivery Division at (510) 238-2938.

We appreciate your patience and cooperation during this work.
