

BART MARKET STREET STATIONS ENTRANCE PROJECTS

## Neighborhood Notice and News

**MAY 2021**

### **Temporary escalator closures begin late May 2021 at Montgomery and Powell Street stations to make way for installation of new units**

BART is moving forward with its Market Street Escalators Renovation Project by beginning prep work this month for the next set of new escalators to be installed at the Montgomery Street and Powell Street stations. Three escalators will be replaced in this next round of work including the plaza level unit at One Post Plaza at Montgomery, a platform-level escalator at Montgomery, and a platform-level escalator at Powell.

On May 24 the BART / MUNI Montgomery Station entrance to and from One Post Plaza will be completely barricaded and closed during the escalator replacement project from May to November 2021.

On May 24 BART will reopen the south side entrance at the corner of Market & New Montgomery in front of the Sheraton Palace for ease of access while the north side escalator at One Post Plaza is closed during construction. Also, the east side platform escalator at Powell Street Station will be temporarily closed starting in late May for the start of replacement work. Directional signage will be posted at the closed entrance sites to inform BART and MUNI riders.
