4. Station Access Signage and Wayfinding Update

Jumana Nabti gave the presentation on “Station Access Signage and Wayfinding Update.”

Jumana Nabti shared an update on the signage program that was previously presented at a BATF meeting and shared that there have been changes and did an overview of the changes. She mentioned the changes to the signage that is being developed are for the curb zones, parking areas, bus stop location areas, and bicycle parking areas.

Jumana Nabti announced she will be posting draft designs for the BART website for the public to see and to make comments. She mentioned when the draft signage is ready to be posted online, she will let BATF members know and added she would love to get members’ feedback.

Janet Abelson expressed it was hard to get a sense of the actual size of the signs. She also asked how high the signs are from the ground.

Valerie Buell asked about the color contrasting on some of the signs and she stated she really likes what she’s seeing. Jumana Nabti stated the signs are at seventy percent color contrast and her team is finalizing this for review now.

Valerie Buell wanted to know if the new signs will be done to help draw someone’s eye to the new installed signs and added there are times when using the path of travel that signs are hard to read.

Marjorie (Marji) McWee thanked Jumana Nabti for her presentation. She expressed concerns that the font on some of the signs can be pretty small to where you almost have to be right in front of the sign to read.
Helen Walsh stated the signs can be “overcrowded,” to where there can be too much information on one sign and this can be difficult to read for people with low vision.

5. **BART Accessibility Improvement Plan Update**

Ahmad Rassai (AR) presented “BART Accessibility Improvement Plan Update.”

AR updated on Accessibility and Improvements in two components:

1. The “Accessibility Improvements Program (AIP) - Phase One” is contracted for five stations: North Berkeley, Castro Valley, Rockridge, Richmond, and Lafayette. The Request for Proposal received one bid that was over AIP project budget. AR is working on repackaging the contract for rebid and on strategies for attracting more bidders, hopefully leading to more competitive bids that would fall closer to his budget.

2. For the second component on hearing loops, AR said 85% to 95% of the BART Stations have hearing loops. There are seven BART stations that still need to install hearing loops in the station agent booths: Orinda, Walnut Creek, Pleasant Hill, Concord, North Concord, Pittsburg/Bay Point, and El Cerrito del Norte. AR noted that the hearing loops on hand were used to replace damaged units. Additional hearing loops and new parts need to be ordered for completing the remaining BART stations and to stock up for future replacement needs.

AR also shared he had a meeting with both San Francisco Municipal Transportation Agency (MUNI) staff and BART Staff to collaborate about putting hearing loops in the Muni Station Agent booths. He mentioned they should be installed hopefully in the next few months, after it is determined which agency will perform the work and procure the hearing loops sets and equipment. AR will order additional replacement sets for unfinished BART Stations and possibly for Muni Stations, pending any agency agreement(s).

Helen Walsh was happy to hear that hearing loops are being installed within the BART System and is aware that this is still work-in-progress.
