9. Provides responsible staff assistance for higher level management staff on projects and related matters.
10. Attends and participates in professional group meetings; stays abreast of new trends and innovations in the field of engineering design and construction.

QUALIFICATIONS

Knowledge of:

- Principles and practices of engineering disciplines in assigned project area.
- Principles and practices of engineering design and construction in assigned project area.
- Electrical power technical requirements for traction power systems.
- The function of traction power systems for transit applications.
- Principles and practices of project management.
- Principles and practices of contract administration.
- Principles and practices used in the preparation of designs, plans, specifications and cost estimates.
- Methods and techniques of coordinating and scheduling project work.
- Methods and techniques of contract negotiation.
- Principles and practices of procurement.
- Principles and practices of budget development and administration.
- Current office procedures, methods and equipment including computers.
- Related Federal, State and local codes, laws and regulations.

Skill in:

- Managing, supervising and coordinating assigned projects.
- Developing and implementing project goals, objectives and procedures.
- Planning, organizing, directing, and coordinating the work of professional staff and contract consultants.
- Planning, organizing, scheduling, monitoring and reviewing project work.
- Managing project design concepts and solutions.

Project Manager, Traction Power

Page 3

- Managing and reviewing project budget analysis, calculations and cost estimates.
- Preparing designs, plans, specifications and cost estimates.
- Directing or conducting contract negotiations.
- Conducting field inspections.
- Soliciting and acquiring organizational support for projects.
- Developing and administering project budgets.
- Determining beneficial advanced technological applications to transit.
- Analyzing problems, identifying alternative solutions, projecting consequences of proposed actions and implementing recommendations in support of goals.
- Interpreting and explaining established policies and procedures for assigned District projects.
- Preparing clear and concise reports.
- Operating office equipment including computers and supporting word processing and spreadsheet applications.
- Communicating clearly and concisely, both orally and in writing.
- Establishing and maintaining effective working relationships with those contacted in the course of work.

MINIMUM QUALIFICATIONS

Education:

Bachelor's degree in Engineering or a related field from an accredited college or university.

Experience:

Five (5) to Seven (7) years of professional verifiable experience in electrical engineering, engineering project management or related experience.

Substitution:

Additional professional experience as outlined above may be substituted for the education on a year-for-year basis. A college degree is preferred.

WORKING CONDITIONS

Environmental Conditions:

Office environment; exposure to computer screens; field environment; travel from site to site.

Physical Conditions:

May require maintaining physical condition necessary for walking, standing or sitting for prolonged periods of time; Must possess sufficient physical mobility to inspect construction in progress or review other projects.
